

A special presentation by South African author, scientist, explorer

# Michael Tellingner

## USA 2013 Slave Species Tour

18 July – 3 Sept 2013

### How do we connect the origins of our species to the confusing world we live in today?

More than 200,000 years ago, an advanced civilisation of humans lived in southern Africa mining gold. They carved the first Horus bird, the first Sphinx, built the first Pyramids and built a mysterious stone calendar right in the heart of it all. South African scientist, explorer and internationally acclaimed author, Michael Tellingner has made startling discoveries regarding the origins of humankind, vanished civilisations of Southern Africa, and how it connects us to the 21<sup>st</sup> century. His research exposes the mysterious origins of money and the rise of the royal- banking bloodlines that control the world today, as they did 6,000 years ago. His discoveries touch upon human origins, spirituality, science & consciousness while he proposes a completely new social structure called **UBUNTU CONTRIBUTIONISM – a world without money.**

**The Lost Civilisation of Southern Africa  
Origins of Humankind  
Gold Mining Empire of The Anunnaki  
Advanced Technology of the Ancients  
Exposing The Banking & Corporate Fraud  
UBUNTU Contributionism – A world without money  
Convergence of Science, Spirituality and Consciousness**
